

Permit Appeals Process Comment – January 13, 2023

Please provide a redline/strikeout version of the proposed emergency rulemaking to amend section 66271.18 and all documents that will be submitted to OAL for review and approval. The redline/strikeout version available on your website does not show how the proposed regulation text amends current text. In addition the text does not include relevant authorities and references. Please also explain how proposed changes comply with APA requirements for forms. Please explain why authority is delegated to the clerk of the board and not the executive officer. Finally, please make all comments submitted on the proposed amendments available to members of the public with meeting materials.
